

How customization can help you avoid high costs, delays and risks

Did you know that more than 25 percent of motion system projects end up requiring at least some degree of customization? Standard catalog products don't always fit a project's requirements. With that in mind, it is a good idea to prepare for a custom solution from the outset. [A recent article](#) looks at the key factors to consider when standard products may not meet your application requirements. It also provides a few customization examples and debunks several myths surrounding linear motion product customization.

Online resources such as the Thomson Instant 3D Quote Tool allow designers to upload a CAD file, make real-time changes, choose a material, and receive a quote and lead time immediately, thereby saving them costly time and keeping projects on track.

The next evolution of electric linear actuators has arrived with the Electrak[®] XD

The [new Thomson Electrak XD](#) is strong enough to take on hydraulic applications while, at the same time, be smarter, smaller and more efficient than competitive technologies. On top of its groundbreaking strength, the XD offers extensive protection against even the harshest conditions and ingress, and

features enhanced controllability and diagnostics via onboard controls.

Key highlights of the Electrak XD include:

- Load handling up to 25,000 N
- Duty cycle up to 100%
- Strokes up to 1200 mm
- Speeds up to 75 mm/s
- Internal load holding brake
- Optional shock load dampening
- Optional manual override
- Constant monitoring and diagnostics

Don't miss us at MD&M
Booth #1655

MD&M WEST
February 7-9, 2023
Anaheim Convention Center
Anaheim, CA

During your visit to Medical Design & Manufacturing West, be sure to stop by the Thomson booth (#1655) to learn how our linear motion components can optimize your medical device designs. Our products can be found in many applications, including:

- > Diagnostic/Treatment
- > Lab Automation
- > Patient Handling
- > Packaging/Automation
- > Rehab Equipment

CLICK HERE for a **FREE** expo pass & **20% off** 2-day conference pass

New Products on Display
Compact Linear Systems
Miniature Lead Screws
Precision Ball Splines
Polymer Bushings
